DUKANE ANNOUNCES NEW HDMI DOC CAM

The Camera 336B from Dukane brings a whole new perspective to the classroom. The digital gooseneck camera shows documents and 3D objects in amazing clarity. By connecting the Camera 336B to a projector or other large display device you no longer have students crowded around a table trying to get a glimpse of the material being presented. High definition output via HDMI means superior image quality and optical zoom means outstanding detail. Capture still images and videos with audio to the internal memory or the included SD card which can be easily removed for sharing. The flexible design and small footprint make the Camera 336B an excellent choice for any classroom.

MAP on the Camera 336B is \$599.

Visit www.dukane.com/av and click on cameras for more information.

For more than fifty years, Dukane's Audio Visual Products Division has provided schools around the world with technology solutions that helped increase student learning. With a network of trained professional dealers available to provide personal and localized sales support, Dukane is committed to meeting each customer's particular needs.

Since 1922, Dukane has been involved in the development of systems and equipment for the educational, commercial, and industrial markets. Today, the company is divided into two operating divisions which produce diversified product offerings including audio visual presentation equipment and ultrasonic assembly
