Dukane Announces New, Affordable RF Wireless Microphones

The Dukane WM1C1 is a RF based wireless microphone system that includes receiver, transmitter, two microphones, lavalier and charging device. The WM1C1 has 80 separate RF channels so school buildings will be able to install the wireless mic without fear of cross talk. The WM1C1 can be installed in an existing projector with a mic in port and larger speakers. This makes installation super easy. It can also be incorporated with an existing amplifier and speakers. **The MAP on the WM1C1 is \$249** which makes it the lowest cost RF wireless mic system available today. This will increase learning in any environment this is installed because the instructors will be heard.

Click this link for more information on the WM1C1.
